- Compatible with leading restaurant management software
- EMV encryption and tokenization

Serious Security

Did you know 80% of card data compromises take place in small businesses? That's why your security is our top priority.

- Tamper-Proof: If tampering or theft is detected, our terminals disable with an alert interruption.

- Encryption: All information that travels through our applications is encrypted, so your customers' data stays secure.

- Tokenization: Our E-Commerce solutions ensure all payment data is tokenized and encrypted for your customers' security.

- Fraud prevention: You get dispute notifications, chargeback support, and the ability to monitor your account at any time.
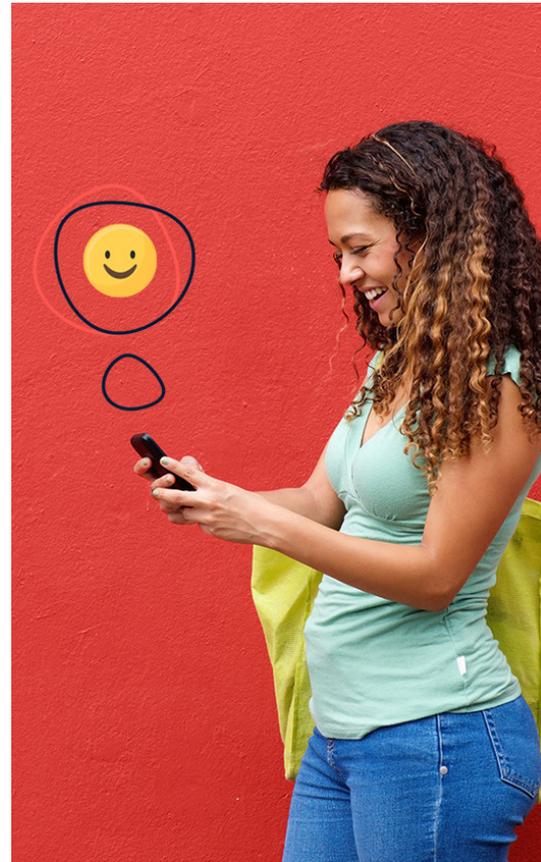

Safe-T Security Solutions

Get the highest level of data breach protection for your business with payment encryption and tokenization.

- Payment encryption: All sensitive information is scrambled at point-of-entry (EMV/ chip, swipe, key-entered, and contactless).

- Payment tokenization: Payment data is automatically replaced with randomly generated numbers, making it useless to thieves in the event of a data breach.

- PCI-DSS compliance: Reduces the time spent confirming compliance by 60%.

- Data breach protection: Up to $250,000 per occurrence in financial reimbursement.

PCI Plus

Save time on PCI-DSS compliance processes and get step-by-step instructions and assistance.

- PCI-DSS compliance: Reduces the time spent confirming compliance by 60%.

- Data breach protection: Up to $250,000 per occurrence in financial reimbursement.
